A NOTE FROM Donnell

Donnell Brown

Dear Friends,

It is good to be home and return our March sale back to Throckmorton after a couple of years north of the Red River. Thanks to the White family for hosting our sale for the past two years while we grew our program and our facilities so that we can develop and market all of our bulls back here at home on the ranch just in time to host this our 4th Annual March Bull Sale.

Throughout this catalog you will see pictures of many smiling kids that loved playing in the mud at our October sale. Many of us had the wettest fall and early winter on record. It produced some challenges, but the great news is that all of the water reservoirs are full, the ground is full wet and primed to have an amazing spring with lots of grass.

Our family was blessed with a once in a lifetime experience last fall when 28 of us traveled to Louisville, KY. We enjoyed 3 days together that culminated with Dad receiving the highest honor given in the Livestock industry as he was inducted into the Saddle and Sirloin Club. A great time was had by all and we thank everyone who attended the big event and for so many of you who wrote letters of support. A big thanks also to Bob Hough for all of his efforts to put the huge application together and capture Dad & Mom's life stories in biographical form.

I will celebrate half a century of living this March and I am so thankful to have had access to the most accurate tools for genetic selection. However, over the past year and a half we have experienced by far the biggest changes to genetic predictions in history. All three of the breed associations that we register cattle with have experienced major shifts in their EPDs with the transition to the new improved science of "Single Step" or "BOLT" genomic methodology. EPDs change every time we get better math, science or information. This just happened to be a big change all at one time. The good news is that you have been seeing the % Ranks for each trait in our catalog for decades and we our exclusive Star Rating System summarizes all the information for you to make your selections easier and more accurate. You may see a few changes in the EPDs, but the cattle in this sale are still some of the most superior genetics in the business. In addition we are still testing our cattle for all economically relevant traits while developing the bulls for added longevity so that they produce more calves that make you more money.

Throughout this transition, the most consistent genetic prediction tool that has helped identify our best cattle has been the $Profit database. We started using $Profit as a "third party" genetic prediction tool in 2014. We had been studying the database for several years prior and liked what we saw. We had also decided to invest hundreds of thousands of dollars to measure feed efficiency and $Profit was and still is the only multi-breed genetic evaluation that gives us EPDs for Feed Efficiency so you can accurately compare all of our bulls across breed for feed efficiency. In addition you can compare all of the bulls across breeds for what we believe are the two best indexes in the industry: $Ranch and $Profit. We are so glad we chose to add $Profit tools to our tool box to help you most accurately select the cattle that fit your needs the best.

- < $2,500 (12.5%)

Red Angus: $20,000

Black Red Angus: $15,000

Red Angus: $8,500

Angus: $6,500

Red Angus: $5,500

SimAngus: $4,500

SimAngus: $3,000

Angus: $2,500

Continuation of letter from pg 4

We continue to use $Profit in combination with EPDs from each of our breed associations because we want to use all of the tools available so that you can make the most accurate decisions. It costs us more money to have all of our animals calculated in the $Profit database, but you, our customers, deserve to have the best tools and be able to compare animals across breeds. We spend countless hours with each of our breed associations and genetic evaluations to help each of them be the very best they can be. We do this because we know that the more accurate each genetic evaluation is, the more accurately we all can be at identifying and producing better cattle.

We sincerely appreciate the opportunity to serve you and we remain committed to using the best tools, strategies and our services to help improve your profitability and sustainability in the cattle business. Please let us know how we can help you.

Sincerely,

Donnell

Donnell, Kelli, Tucker &
Lanham Brown

Our Partners

Thats what we call these special friends. All of them have one thing in common .... they provide and service an exceptional product. Please visit with them on sale day and you'll see why we are pleased to have them working with us.

1. Spitzer Animal Health (pg 131) - Providing & serving sale day breakfast.
2. Livestock Nutrition Center (pg 79) - Providing & serving Sale Day Lunch.
3. Neogen (pg 31) - Providing & serving Tuesday evening meal.
4. ADM Animal Nutrition (pg 45) - Providing & serving Tuesday evening meal.
5. Ag Defense Risk Management (pg 128) - Talk to our friend Shari about insuring your purchases today!

Portrait by: Richard Halstead

R.A. "Rob" Brown, Jr was inducted into the Saddle & Sirloin Gallery on November 11th, 2018 in Louisville, KY. The Saddle & Sirloin Portrait collection honors individuals who have demonstrated lifetime achievements and significant accomplishments in the Livestock Industry.

DETAILS

LOCATION: R.A. Brown Ranch Headquarters; 204 Brown Ranch Road; Throckmorton, TX 76483. It is located 4 miles west of Throckmorton on HWY 380. Then turn at the ranch sign and go 1 mile north on County Rd 112.

SALE ORDER & CHUCKWAGON: The sale begins promptly at 10 am with cattle selling in catalog order. Our complimentary meals, Tuesday Dinner, Wednesday Breakfast & Lunch are courtesy of our friends from Spitzer Animal Health, Livestock Nutrition Center, Neogen, and ADM Animal Nutrition. We highly recommend these folks and encourage you to visit with them about their outstanding services.

Bill Angell - *Special Assignment,* 970-396-5594

AIR TRANSPORTATION: Wichita Falls: 75 miles, Abilene: 75 miles (both are usually less expensive than DFW) Dallas/Ft Worth: 150 miles. For those with private planes, Throckmorton has a lighted, 60' x 3700' runway. Olney is 30 miles away and has three 5100' runways. The N/S is lighted. They also have E/W and fuel availability 24 hours. Please call us in advance and we will make plans to pick you up at Olney or Throckmorton airports.

HEALTH: 1) To insure that our cattle are healthy and to provide you with healthy cattle, we have a strict vaccination, herd health and biosecurity protocol. 2) All cattle have been VACCINATED to prevent Blackleg, IBR, PI3, BVD, BRSV, Vibrio, Lepto and Pinkeye. R.A. Brown Ranch is Certified Brucellosis Free Herd #4808. 3) All bulls in this catalog are CERTIFIED AS VIRGINS unless otherwised marked. All non-virgin bulls have been trich tested. 4) INTERSTATE HEALTH PAPERS will be provided for animals going to states that only require the specifications listed above. Any additional testing (i.e. TB, Trich on Virgin bulls over 12 months of age etc.) will begin after the sale and those interstate health papers will be ready after all testing is completed. If you plan to haul your own cattle after the sale across the state line, please check with your state veterinarian to make sure your state will receive cattle from us without additional testing.

FERTILITY GUARANTEE: All bulls and females are guaranteed breeders as described in the "Terms & Conditions" at the back of this catalog. All of these bulls have passed a Fertility Test. None of us can afford a bull not doing his job. Bulls can become temporarily infertile due to fever, excessive heat, injury, diet (whole cottonseed or poor diet), etc. We have experienced this with bulls we purchased with breeding soundness exams and took for granted that they were still ready to breed cows. It is several months until breeding season and we recommend that you fertility test all your bulls 30 days prior to each breeding season every year. If you find a bull infertile please contact us immediately. After a second failed test, at least two weeks after the first, we will replace the bull or give you credit, according to the "Terms & Conditions" in the back of this catalog. Getting your cows pregnant is a high priority for us.

DELIVERY of BULLS and FEMALES: Please see the detailed information on our Delivery Service, pages 14-15.

INSURANCE: Mortality and Loss of Use Insurance will be available for purchase on sale day from Ag Defense Risk Management / Shari Holloway.

FUTURE CARE: We appreciate your investment in R.A. Brown Ranch genetics and want to make some recommendations to help you protect your investment. The stress of the sale, hauling, and relocating these animals can weaken their immune system; therefore, keep them up close so you can check them daily for a couple of weeks. We recommend vaccinating for Vibrio/Lepto and fertility testing your bulls 30 days prior to the breeding season each year. 18 month old bulls can be used very effectively when turned out with one cow/month of age (18 months - breed 18 females). Remember they are still growing and losing their baby teeth so they may need some extra care after their first breeding season.

BUYING OPTIONS: Obviously we prefer for you to be with us on sale day but, if you are unable to make it you have three options: 1. Webstream & bid by DV Auction (see info at top of page 11). 2. Personalized Bull Shopper. We will be glad to find you the bulls you need, within your budget. To utilize this option, like about 20 of our long-time customers, please call Donnell Brown before sale week so that we can discuss your genetic needs. 3. Customer Service Represenatives. These men will be here and have studied the bulls. They can also put their eyes on specific cattle for you.

MORE INFORMATION: We want you to have all of the info you need to make the best decisions. To view more information, we have included registration numbers on the registered animals so that you can look them up on the web, or you can visit our website at www.RABrownRanch.com to sort the animals and/or view their data in spreadsheet form. If you want more information about these bulls and/or females than what is in this catalog or on the web, please call and ask prior to Sale Day. In an effort to simplify the process, we have included the information in this catalog that we believe to be the most useful tools in describing genetic merit of each animal for economically relevant traits. To contact Donnell or Kelli Brown, you may call the ranch at 940-849-0611 or email us at info@rabrownranch.com.

ONLINE BIDDING AVAILABLE

DVAuction
Broadcasting Real-Time Auctions

Watch and Bid Online at DVAuction.com

Can't make the sale?

We are pleased to bring you real-time Internet bidding and a live broadcast of this sale through DVAuction. To watch or bid online, simply complete the following steps:

- Visit the DVAuction web site at www.dvauction.com
- Click on the "Creat New Account" tab
- Enter a user name, password and your contact information.
- Complete the Banking Information. (If you are only interested in viewing you can skip this section)
- Select your Time Zone, Accept the Terms and Conditions and click "Create Account"
- Complete the process by answering a few questions, selecting your subscription choices
- Click on "Apply for Bidding" in the upper left corner of your screen to select the sales you wish to bid on
- Be sure to include a personal contact at your bank, we will contact them in order to get a credit reference.
- If you would prefer to be approved using your credit card, call (402) 316-5460.
- Please be sure to apply for bidding at least a day in advance of the sale-every effort will be made to process your application in a timely manner.

DVAuction will contact you once you have been approved to bid. We do not provide buyer numbers until you have purchased a lot in the sale, and that number is only usable for that auction. After the sale contact the sale owner or manager to make arrangements for payment and delivery of your online purchases.

Please Note: High speed Internet access (DSL, T-1, or Broadband) is required to be able to bid successfully during the sale. If you have any questions, please contact DVAuction at (402) 316-5460 or email support@dvauction.com.

Proxy Bidding: If you can't access a computer during the sale, you can now place a "proxy bid" through DVAuction. Simply follow the instructions listed above, and as the sale date nears there will be a "Proxy Bidding" link under the sale listing on the main page of DVAuction. You can then place the maximum amount that you'd like to bid, and our system will represent your bid just as if you were there.

PLEASE CALL the phone number shown on DV Auction to settle up after completing your purchases.

RETAINED INTEREST IN BULLS

OWNERSHIP - We are selling full possession, full salvage value and 1/2 revenue-sharing semen interest in every bull in this sale. This means the bull is totally in your control in how you want to handle him plus you get 100% of the salvage value of the bull. We are retaining 1/2 revenue-sharing semen interest in every bull in this sale. This simply gives us the right to half of the semen sales revenue from the bull if at some time in the future, semen sales become a possibility.

If you sell the bull to anyone else, R. A. Brown Ranch retains our semen interest. If you wish to buy a bull in this sale and would prefer that we did not retain a semen interest, then please talk with us about it prior to the sale and we will consider selling the bull(s) to you without us retaining an interest and make that agreement in writing prior to the sale. The buyer may elect to purchase as much additional semen interest as you desire by paying the additional pro-rated amount. For example you can purchase 2/3 or 3/4 semen interest by paying an additional 33% or 50% of the final bid price respectively.

If a buyer is not interested in marketing the semen from a bull then R.A. Brown Ranch reserves the right to collect a semen bank on the bull at our cost and the buyer's convenience. That semen would be 100% owned by the R.A. Brown Ranch for our use or marketing.

EXCLUSIVE SEMEN MARKETING RIGHTS - The buyer may elect to purchase exclusive semen marketing rights on any bull in this sale by paying double the final bid price on the bull at the time of the sale. In the event that the buyer elects to purchase exclusive semen marketing rights, then R.A. Brown Ranch retains the right of first refusal on the purchase of natural service rights of the bull if the original buyer decides to sell the natural service rights and or possession of the bull anytime during his lifetime.

REALISTICALLY SPEAKING - It is unlikely that large amounts of semen will be sold from very many bulls. However, the reason we are keeping an interest in every bull, is that we want to keep it simple and we have great bulls scattered throughout the sale. The bulls that do develop a market for large amounts of semen can be very financially rewarding; therefore, as a breeder of some of the best seedstock in the industry, we want to share with you in these bulls. Even bulls sold to commercial herds may become popular at a later time, especially if carcass data is collected on their calves. We want to be a great partner with you.

SEMEN RIGHTS - Buyers receive semen rights proportional to the interest purchased. Therefore if you purchase a 1/2 revenue-sharing semen interest then you are entitled to 1/2 of the semen collections at cost provided that you indicate that you want semen prior to collection. If you choose to collect semen from one of these bulls as an "insurance policy" for your own use, that semen is 100% yours, but before any semen is collected on any bull in this sale, R. A Brown Ranch must be notified.

FURTHER TERMS IN THIS REGARD - See Sale Terms and Conditions at the end of the catalog.

STAR RATING SYSTEM & SELECTION GUIDE

Our exclusive Star Rating System is designed to help summarize all of the data and simplify your selection process. It takes into account all information available, along with some "cowboy common sense" to rate each bull in the areas of Calving Ease, Growth, Carcass and Efficiency. These ratings are consistent throughout the catalog so that you can even compare across breeds. EPDs are the most precise tools for selection within a breed and now can be used to compare Red Angus, Black Red Angus & SimAngus, however, EPDs are not comparable across all breeds yet.

The more stars they have, the better they are in that trait. Each bull is rated from 0 to 5 stars in each trait. Our Five-Star rating is the same as it has been in the past and designates elite bulls in each category. For Growth, Carcass and Efficiency, a bull has to be in the top half of the industry to even get 1 star. A Five-Star rating is only given to the cream of the crop, the most ultimate.

Use the individual EPDs and their respective percentile ranks to most accurately determine which bulls can help you best meet your specific needs. For example when looking at the Growth Rating, if you sell your calves at weaning time then you should look more specifically at WW EPD. For Carcass, if you need more quality grade then put more emphasis on Marbling EPD.

You may notice that our Calving Ease ratings are much more conservative than what many breeders and breed associations may recommend for use on heifers. We believe it is better to be safe than sorry. This doesn't mean that you never have to assist one at calving, because sometimes calves are born backwards or have a leg turned back. Even the best and most proven Calving Ease sires in the industry will get a big calf every once in a while. Our goal is to help eliminate calving difficulty to the best of our ability and therefore help you manage risk.

This year we added Stars for Efficiency. Our efficiency stars are designed to help you select bulls that will produce more feed efficient offspring as well as more efficient, easier keeping daughters that are medium sized and have a medium milk production level and are therefore more likely to stay producing calves in your herd for many years.

This Star Rating System is simply a tool to help you quickly find the bulls that fit your needs. Then you can take more time studying the details to find the bulls that best fit your more specific needs.

Calving Ease Rating

5 ***** Star Ultimate Calving Ease for any breed of heifers & cows
4 **** Star Elite Calving Ease for any breed of heifers & cows
3 *** Star Superior Calving Ease for well developed heifers and all cows
2 ** Star Excellent Calving Ease for heifers with Brahman influence & all cows
1 * Star Good Calving Ease for heifers with 50% or more Brahman & all cows

Growth Rating

5 ***** Star Ultimate Growth
4 **** Star Elite Growth
3 *** Star Superior Growth
2 ** Star Excellent Growth

Carcass Rating

5 ***** Star Ultimate Carcass
4 **** Star Elite Carcass
3 *** Star Superior Carcass
2 ** Star Excellent Carcass
1 * Star Good Carcass

Efficiency Rating

5 ***** Star Ultimate Efficiency
4 **** Star Elite Efficiency
3 *** Star Superior Efficiency
2 ** Star Excellent Efficiency
1 * Star Good Efficiency

LOAD OUT INFORMATION

DELIVERY
We can deliver the bulls at least 80% of the distance to your ranch. We will not drop at your ranch except on purchases totaling over $40,000. Preferred delivery drop points are not guaranteed and are subject to change depending on load routes. We try hard to get the cattle to everyone as safely, timely and cost effectively as possible.

FREE DELIVERY
We are offering free delivery to our "preferred delivery points" within the continental US for each buyer that purchases at least $15,000 in bulls or $30,000 for any combination of bulls and registered females. For purchases totaling less than these amounts, we will provide delivery service to a "preferred delivery points" at the costs outlined on the next page. Please inform us when you check out if you are hauling your own or that you would like us to coordinate the delivery of your cattle. If you want us to deliver the cattle, we need you to fill out a Delivery Information Sheet in the sale day supplement and give it to the clerk when you pay out. Please note the cost of delivery associated with each delivery point. These charges will be reflected on your invoice on a per head basis.

LOAD-OUT SERVICE (for all registered cattle)
Many people prefer to haul their own cattle, and we are glad to help make this process as quick and easy as possible. If you choose to haul your own cattle, we can load them any time during the day on Wednesday through Saturday. We can load your cattle during the sale but you must first pay out and then bring the extra copy of your bill of sale (that you will receive at check out). Cattle will only be loaded when you present the extra copy of the paid Bill Of Sale. All animals that are to be hauled by the customer will be cared for at no cost through noon Saturday (3 days after the sale). Starting at noon Saturday there will be a charge of $6/head/day for all remaining animals that were to be picked up by the buyer. There will be no charge for feed and care of animals that are designated for us to deliver when you check out unless the delivery is delayed for any reason by the buyer. We can have Interstate Health Certificates for all animals that are going to states that accept cattle without additional testing. However, if your state requires additional testing like TB or Brucelosis, or Trick for virgin bulls, then that will be done the week after the sale and we can provide Interstate Health Certificates as soon as vet has all of the requirements met including permits from the buyer's state.

TAKING DELIVERY ON COMMERCIAL FEMALES
All commercial females sell FOB the ranch they sell from as described in the catalog. The buyer is to coordinate directly with the seller of the heifers to coordinate picking up the heifers.

PREFERRED DELIVERY POINTS
The destinations on the chart have been selected as "Preferred Delivery Points." Please select the two delivery points that are most convenient for you. Drop points may be adjusted after the sale time depending on the location and purchases of each buyer. Please keep in mind that this is a guide for "Preferred Delivery Points," not guaranteed delivery points. We will be glad to calculate the cost to additional delivery points after the sale. Please give us your home, office and mobile phone numbers so that we can contact you (and anyone else that may be involved in receiving your cattle) in regard to the delivery of your cattle.

RISK and INSURANCE
As outlined in the Terms and Conditions in the back of this catalog, all cattle become the risk of the purchaser as soon as they are sold. To protect your interests, insurance will be offered & can be purchased at settlement time. The cost of this insurance is minimal and we encourage all buyers to purchase it to cover the animal for at least one month.

Free Delivery for Bull Purchases totaling >$15,000

Free Delivery for Bull & Registered Female Purchases totaling > $30,000

FROM THE RANCHER'S DESK

Ten things to remember when selecting your next herd bull.

1 Take selection seriously and professionally. He accounts for at least half of your calves potential and can be an investment that pays significant dividends….don't sell yourself short. If you save replacement heifers, his influence will be felt for years.

2 Identify all the traits that make an animal profitable and sustainable for your particular business. Often times this is not ONE but multiple economically relevant traits. Remember the importance of docility for your situation.

3 Get the bull to fit your cows, that creates the calves that fit your market (whether they be terminal or replacements).

4 Use all of the available tools. EPDs aren't new, they've been around for the better part of four decades.

5 Request spreadsheets with all of the EPDs, indices and percentile ranks so that you can sort through the mounds of numbers you have prioritized and "judge your class on paper."

6 Use your short list to then do physical evaluations once you arrive at the sale location or by individual videos provided on the seller's website.

7 Make sure your bull provider is using DNA and Genomically Enhanced EPDs. Knowing for certain who their daddy is, along with the tremendous increase in accuracy, is a risk management tool you can't afford to do without.

8 Ask your bull provider for help. There isn't anyone who knows those bulls better.

9 How to select your bull provider? We suggest locating someone who listens well. Understanding and evaluating your operation, along with building a product that will sustain your profitability into the future, is the name of the game. Obviously, they need to back up their "sales pitch" with complete performance testing of their genetics to know what will deliver predictable results. Additionally, consider all of the customer service that they offer? Breeding guarantee? Marketing assistance?

10 Start early. This decision can have a significant impact on your ranch economics for a number of years.

We Work Harder - to ensure RAB bulls fit... your Environment, your Cowherd, your Market, & your Budget

If you cannot attend, or would prefer our assistance, we're always glad to find you the bulls you need, and within your budget. Annually, many long-time customers utilize the RAB Bull Shopper service.

If you'd like to use this option, please call Donnell Brown (940)849-0611 before sale week so that we can discuss your genetic needs.

Let us do the work for you. Whether you are looking for 1 or 101 head, we can study your needs and present you with a list of bulls that meet that criteria (genotype & phenotype). Imagine how nice it would be sale day to just look through the bulls on your customized "built to order" list.

If you unable to attend or utilize the webstream on sale day, we'll be glad to handle your order confidentially. We buy the bulls off of your list, at or many times under your budget. They are then delivered with a guarantee that they will be as we represented them. Many long-time customers, like the Paddacks, (see above testimonial) have adopted this service. Our mission is to make sure you get the bulls that best fit!

If you want Profit, Select for it!

This will be our 6th bull sale where feed efficiency information has been provided to help customers make the best-informed selection decisions and ultimately enhance their profitability. However, with additional data, the prioritization of traits according to their relative impact on profitability becomes more difficult. Often, we have 25 EPDs or more to sort, sometimes with genomic rankings... All of which can be beneficial, but it also complicates the task of buying bulls – especially at the speed of an auction. To aid our bull customers in this effort we have invested in the $Profit Alliance. $Profit is by far the best option we have found to provide weekly, multi-breed genetic evaluation, which fully utilizes all of the feed efficiency data we've collected and outputs one single value of relative profitability – that is comparable across breeds. This year we'll provide two such indices: $Profit and $Ranch. These two indices are built using the same economic simulation model but predict different production and marketing scenarios, include different traits and are expressed in different units.

$Ranch: Predicts relative profit when calves are sold at weaning; unlike $Profit, $Ranch does not include the post-weaning traits, and it is expressed in relative $ of profit per calf.

$Profit assumes that the average commercial bull will sire 100 progeny over his lifetime, that 30% of the replacements will be retained and that the rest of the heifers and all of the steers will be finished and sold on a value-based grid. Even though many ranchers sell their calves at weaning – and don't own them all the way to harvest – we have seen feedlots' willingness to pay for calves from genetics recognized for superior post-weaning value.

$Profit Example: $Profit allows us to compare any two bulls and easily calculate the difference in profit they'd be expected to produce over their productive life in your herd. If we compare Bull A at $10,000 $Profit to Bull B at $5,000 $Profit we would expect Bull A to produce $5,000 in additional gross profit ($50/calf).

What traits are included in $Profit?

Nearly every trait that impacts profitability. Here is the list of those traits and how they affect Profit.

Revenue Traits:

- Calving Ease = More Calves
- Weaning & Yearling EPD = More payweight
- Fertility (Days to Conception) = more pounds and more calves
- Carcass Weight = worth more up to 1050 lbs.
- Marbling = valued based on grid premiums
- Ribeye area = value as impacts Yield Grade
- % Retail Product = more yield is more meat

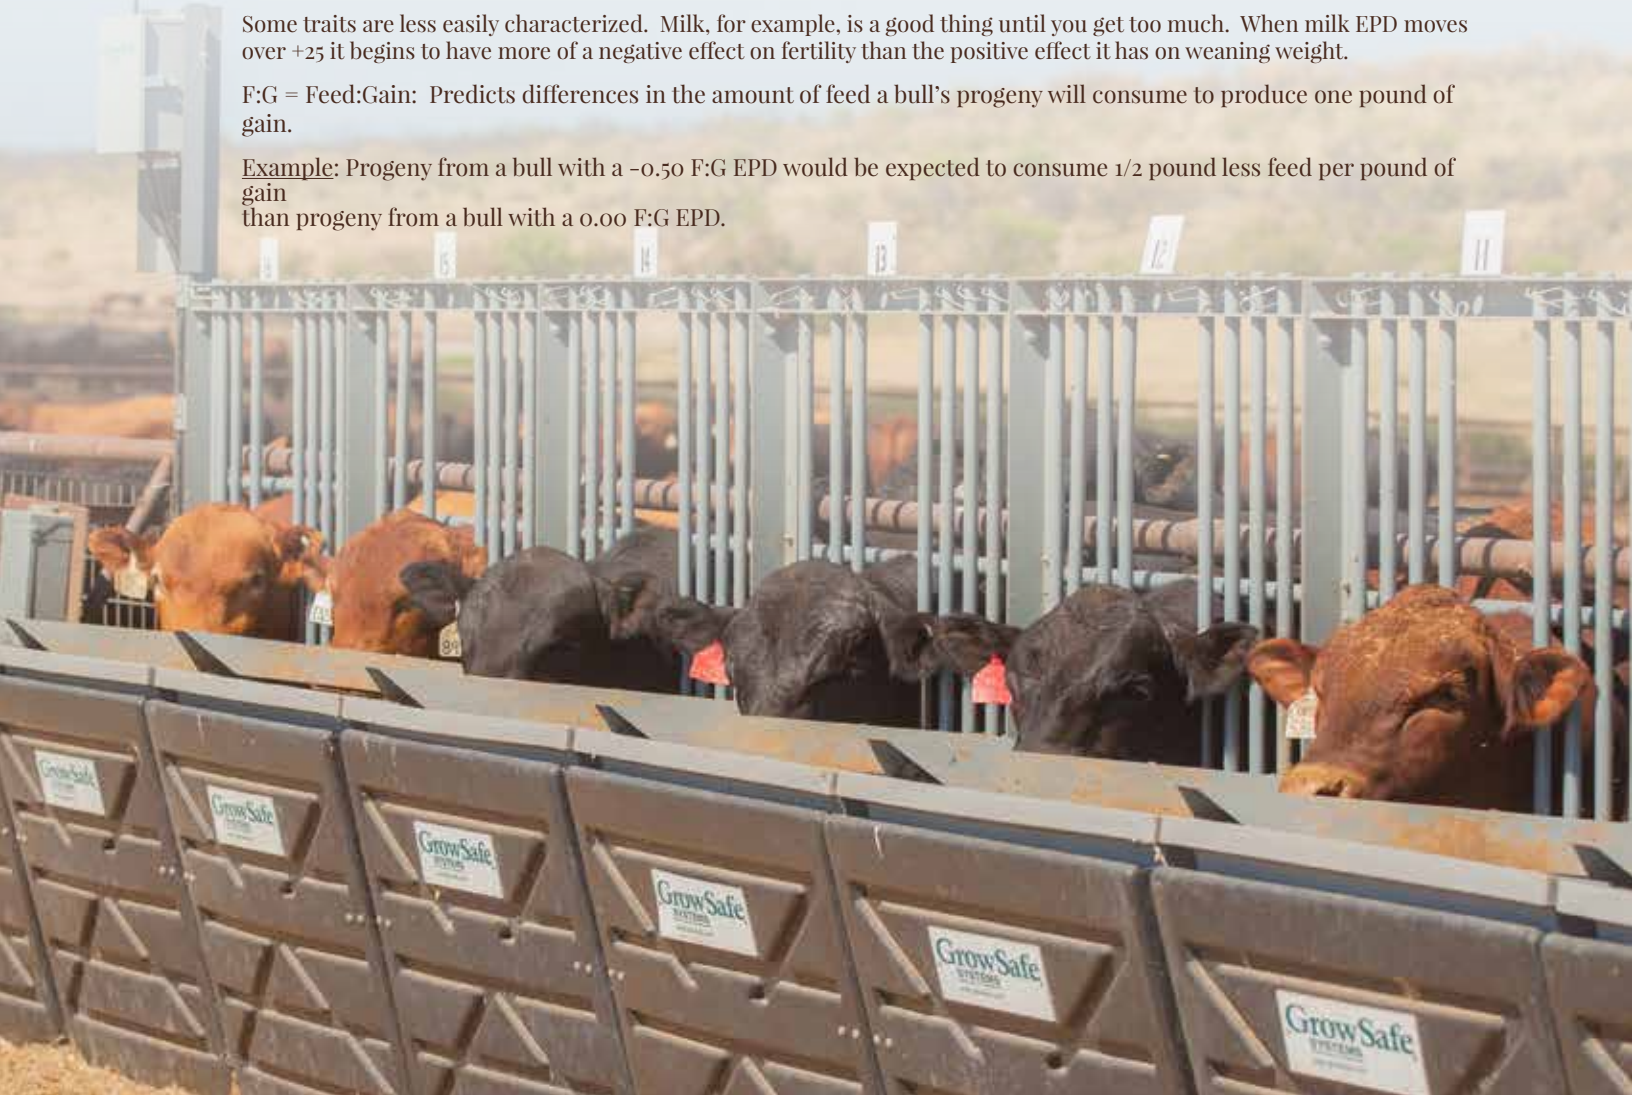
Cost Traits:

- Cow Mature Size = in general, bigger eats more
- Cow intake = increased feed intake means increased costs
- Feed Efficiency = cost of Gain
- Carcass Weight = worth more up to 1050 lbs.
- Marbling = valued based on grid premiums

Some traits are less easily characterized. Milk, for example, is a good thing until you get too much. When milk EPD moves over +25 it begins to have more of a negative effect on fertility than the positive effect it has on weaning weight.

F:G = Feed:Gain: Predicts differences in the amount of feed a bull's progeny will consume to produce one pound of gain.

Example: Progeny from a bull with a -0.50 F:G EPD would be expected to consume 1/2 pound less feed per pound of gain
than progeny from a bull with a 0.00 F:G EPD.



Beef's Next Genetic Frontier is here!

While Feed Efficiency has always driven profit, the tools that allow us to select for improved efficiency have only recently become available.

If we could make a 1-pound improvement in feed efficiency (from 6.5 to 5.5 pounds of feed per pound of gain) that would be worth an additional $5760 per load of 600 lb. calves – That would make your calves worth an additional $12 per cwt.

Angus Bull Sale Catalog Data

Angus EPDs and Percentile Ranks:

CED - Calving Ease Direct
WW - Weaning Weight
Milk - Daughters Milk Production
BW - Birth Weight
YW - Yearling Weight
MARB - Marbling
RE - Rib Eye Area

Percentile Ranks: Percentile ranks indicate where this animal's EPDs rank vs. other non-parent animals in the AAA database. A 10% rank indicates that animal is in the top ten percent of the over half a million non-parent animals in the AAA database

$W: AAA Index compares relative profitability per head for pre-weaning such as: BW, WW, Milk and mature cow size.

$B: AAA Index compares relative profitability per head for post-weaning traits such as: postweaning gain, feed efficiency and carcass merit

F:G EPD is a genetic prediction of relative differences in feed efficiency Lower F:G EPDs indicate less feed will be consumed to produce one pound of gain.. This EPD is calculated using Feed Intake data through the $Profit genetic evaluation.

$Ranch is an Economic Selection Index comparing bulls impact on profitability per calf when keeping replacement females and selling calves at weaning time.

$Profit is an Economic Selection Index comparing bulls' impact on profitability over their productive life (100 calves).

$Profit % rank compares an idividual animal to all animals that have been evaluated in $Profit multi-breed genetic evaluation of over 1 million head.

Docility Score Every RAB bull is individually scored 1-5 for docility where 1 represents the most docile.

BUY BULLS ON TARGET

The Targeting the Brand logo is designed to highlight registered Angus bulls with greater genetic potential to produce calves meeting the most challenging specifications of the *Certified Angus Beef*® brand. Bulls must be at least breed average or better for marbling EPD and $ Grid of non-parent Angus sires to qualify for use of the Targeting the Brand logo. Even when these numbers do not appear on the catalog listing, the logo gives you confidence that these minimum genetic requirements are met. Actual EPD requirements are outlined below based on the breed averages from the Spring 2019 Angus Sire Summary.

Genetic Recommendations:

	Value
Marbling EPD (Marb)	+ 0.53
Dollar Grid Carcass Index ($G)	+ 34.09

To learn more about how commercial cattlemen can further utilize the Targeting the Brand logo in marketing genetically superior feeder cattle, visit www.AngusLink.com

Black-Red Angus Bull Sale Catalog Data

HdBr: RAAA HerdBuilder Index compares relative profitability per cow exposed when bulls are used on heifers and cows, replacements are kept, and all steers and cull heifers are fed and marketed on a value based grid.

GrM: RAAA GridMaster Index compares relative profitability per cow exposed when bulls are used on mature cows but no replacements are kept, and all progeny are fed and marketed on a value based grid.

Red Angus EPDs and Percentile Ranks:

CED - Calving Ease Direct
WW - Weaning Weight
Milk - Daughters Milk Production
STAY- Longevity Epd
REA - Rib Eye Area
BW - Birth Weight
YW - Yearling Weight
HPG - Heifer Pregnancy Rate
MARB - Marbling

Percentile Ranks: Percentile ranks indicate where this animal's EPDs rank vs. other non-parent animals in the RAAA database. A 1% rank indicates that animal is in the top one percent of the approximate 150,000 non-parent animals in the RAAA database

F:G EPD is a genetic prediction of relative differences in feed efficiency Lower F:G EPDs indicate less feed will be consumed to produce one pound of gain.. This EPD is calculated using Feed Intake data through the $Profit genetic evaluation.

$Ranch is an Economic Selection Index comparing bulls impact on profitability per calf when keeping replacement females and selling calves at weaning time

$Profit is an Economic Selection Index comparing bulls' impact on profitability over their productive life (100 calves).

$Profit % rank compares an idividual animal to all animals that have been evaluated in $Profit multi-breed genetic evaluation of over 1 million head.

Docility Score Every RAB bull is individually scored 1-5 for docility where 1 represents the most docile.

Igenity® DNA Profile for the Commercial Cattleman

Can you tell which heifer has the superior maternal, performance, or carcass traits? – Igenity DNA profiles can.

Confident Selection.

Igenity DNA profiling helps commercial cattle producers confidently select replacement heifers for traits that have a major impact on economic productivity.

Valuable insight.

Igenity scores and rankings enable informed decision-making on heifer selection and marketing strategies including custom indexes you build on Igenity Beef Dashboard, delivering a competitive edge.

"NGO would like to thank R.A. Brown Ranch for their pioneering efforts to establish the value of genomic testing. Buy your R.A. Brown Ranch Genomic Enhanced bulls for greater confidence."

These black Angus bulls have what some consider the "Profit Gene" because they include Red Angus genetics that have become the best selling cattle on Superior the past few years because of they make superior replacement females. The grandmother of these first two black red bulls is the famous AbiGrace cow that produced through age 16.5, her mother through 15 and grandmother through age 17. Improve your cowherd by using these new improved Angus bulls.

We really like the Sure Fire cattle because of their moderate stature, superior carcass traits and excellent efficiency combined with outstanding calving ease and good growth. They do all things well making them some of the highest $Profit cattle in the industry On the dam side this bull brings two of the breed's best with Revelation and Nebula. Raising better cattle is about combining the best bulls with the best cows. We work hard to bring you the best and this one ranks in the top 1% for $Profit.

This bull is built stout like a brick outhouse. His sire has been one of the most saught after in the Angus breed for adding muscle, width and overall body capacity for several years. This bull is out of a super momma, the Patricia Rose cow that has done so many amazing things. Use this bull to add growth, carcass and feed efficiency genetics to your herd.

It is so fun to make new improved genetics that make our customer's money. It took 18 years for the industry to realize the added value of these bulls that blend the best of both colors of Angus, but persistance has paid off and these have now become some of our most popular bulls in our sales. Here is a powerfully made with

Wow!!! Here is a bull that ranks in the top 3% or better in 7 different traits. His genetic prowess for superior growth, carcass and feed efficiecy makes him a bull that everyone should have on their list. He is a two year old virgin bull that is ready to breed lots of cows. Many of the other bulls you buy this spring will merely be yearlings, so why hire a boy to do a man's job. Take advantage of our more mature bulls that are develped for longevity to help you produce more calves throughout the life of the bull.

Here is another full two year old virgin bull with amazing Herdbuilder stats to help produce outstanding replacement females. He earned our best, 5-star rating for calving ease and should be a very safe bull for breeding heifers.

Going back to the 18 month old bulls, we have a super footed beast that excels for growth, carcass and efficiency. He is a maternal brother to Brown Perseverance at Select Sires and his mother was one of the high sellers in our Roots sale going to Landon & Janey Powe from Lubbock.

Feed Efficiency, carcass, fertility and strong reproductive traits best describes this Sure Fire son. We are investing heavily in feed efficiency because it is more heritable than weaning weight (which we have all seen the value of selecting for more WW) and can save lots of money throughout the life of his offspring that require less feed and convert very efficiency.

Customer Appreciation - Commercial Bred Heifer Sale

Wednesday, March 13, 2019

Commercial heifers will sell during the 4th Annual RAB Spring Bull Sale
(Following the Black bulls and just before the Red Angus bulls)

Our Customers' Best

Our customers represent a healthy mix of some of southern plains elite ranching operations as well as some of the beef industry's rising generation of superstar cowmen and cattlewomen. They share a common appreciation for profitable beef genetics. Through the front-end bulls they purchase in our annual sales, as well as balanced trait calving ease sires they use A.I., they have developed some of the most sought after, ranch-ready replacement females in the industry. And, they are willing to share their "keepers" in our annual bull sale.

How the Commercial Heifer Sale will work:

- Consignments will all be videoed prior to the sale and video of each consignment will be available through RABrownRanch.com, along with the bull videos.
- Heifers will be sold in **"gate-cut"** sorts of approximately 10 head. The winning bidder will have the option of "rolling" subsequent and consecutive 10 head sorts from the same lot, and at the same bid price.
- The following pages include general descriptions of each ranch's entire consignment as well as delivery information. Our Sale Day Supplement will have updated palpation/ultrasound information and how that impacts the exact number of head in each lot.
- The Commercial heifer lots represented in this catalog will be sold FOB their respective consignor's ranch.

Breeding Guarantee: All commercial Females identified as "Bred" have been determined pregnant by a competent ultrasound or palpation technician.

If prior to May 1, 2019 it is determined (by competent palpation/ultrasound technician) that one of the commercial females you purchased in this sale is not pregnant, then please call us and you will be reimbursed (by the seller) the difference between her purchase price and the salvage value you receive for her.

Sale Method:	Sold in gate-cut groups of 10. Successful bidder can "roll" successive gate-cuts of 10 within this lot.				

20 half-sisters sired by BROWN JYJ REDEMPTION Y1334 and out of top selling commercial females purchased in the 2017 R.A. Brown Ranch Spring Sale and produced by Bellah Cattle Co.

HOW TO READ THE RED ANGUS CATALOG DATA

HdBr: RAAA HerdBuilder Index compares relative profitability per cow exposed when bulls are used on heifers and cows, replacements are kept, and all steers and cull heifers are fed and marketed on a value based grid.

GrM: RAAA GridMaster Index compares relative profitability per cow exposed when bulls are used on mature cows but no replacements are kept, and all progeny are fed and marketed on a value based grid.

Red Angus EPDs and Percentile Ranks:

CED - Calving Ease Direct
WW - Weaning Weight
Milk - Daughters Milk Production
STAY- Longevity Epd
REA - Rib Eye Area
BW - Birth Weight
YW - Yearling Weight
HPG - Heifer Pregnancy Rate
MARB - Marbling

Percentile Ranks: Percentile ranks indicate where this animal's EPDs rank vs. other non-parent animals in the RAAA database. A 1% rank indicates that animal is in the top one percent of the approximate 150,000 non-parent animals in the RAAA database

F:G EPD is a genetic prediction of relative differences in feed efficiency Lower F:G EPDs indicate less feed will be consumed to produce one pound of gain.. This EPD is calculated using Feed Intake data through the $Profit genetic evaluation.

$Ranch is an Economic Selection Index comparing bulls impact on profitability per calf when keeping replacement females and selling calves at weaning time.

$Profit is an Economic Selection Index comparing bulls' impact on profitability over their productive life (100 calves).

$Profit % rank compares an idividual animal to all animals that have been evaluated in $Profit multi-breed genetic evaluation of over 1 million head.

Docility Score Every RAB bull is individually scored 1-5 for docility where 1 represents the most docile.

Top Dollar Angus Designation means calves out of this bull are eligible value added program.

Sale Lot Number: All bulls and registered females sell in catalog order

Animal ID: animal's tattoo no.

	HdBr	GdM	CED	BW	WW	YW	Milk	HPG	STAY	MARB	REA	F:G	$Ranch	$Profit

Herd: identifies cooperator (herd of origin.) Go to RABownRanch.com/cooperators/ and meet our cooperator team.

DOB: BirthDate of Animal

REG# Registration number assigned by the Red Angus Association of America (RAAA)

CAT: All Red Angus and Black/Red Angus Bulls are registered with the RAAA. This indicates their respective registry category and percent Angus parentage.

Max Acc. The presence of a Geneseek (GGP) symbol indicates genomic data obtained through DNA testing have been incorporated into the above EPDs to ensure the highest possible accuracy for non-parent bulls.

RAB Exclusive Star Rating System

Compares bulls across breeds in 4 areas of economic relevance: Calving Ease, Growth, Carcass Merit and Efficiency. In general more stars indicate greater genetic improvement. There is a more detailed explanation of the RAB Star System in the front of the catalog.

MoorMan's®

Rumensin®

Achieve better gain for better profit in a free choice mineral or block.

Why Rumensin?

The only ionophore approved for use in mature, reproducing beef cows

Improves feed efficiency,* thus helping to maximize profitability by maintaining cow body condition on 5-10% less feed[1]

A proven management tool that protects your investment by increasing the selling weight of your stockers while preventing and controlling coccidiosis

Labor Savings

Free choice...just set them out

Our #1 goal is to improve your profitability and sustainability in the cattle business. We strive to use all tools available to us to most accurately accomplish this goal for you. We have invested hundreds of thousands of dollars to measure efficiency which we believe is the next great frontier. It is helping us identify cattle like this bull that gain very efficiently and enhance your profit by saving you money. In addition we really appreciate ACHIEVER'S light birth weight to help maximize your calf crop and calving interval while producing highly marbled beef that makes your mouth water. This bull does it all with stacking highly proven breed greats and is the best combination of $Ranch and $Profit in the entire offering.

Herd Sire Alert! Take a look at this bull that ranks in the top 1% for both the Herdbuilder and Gridmaster indexes and has a total of 6 traits in the top 7%. In addition, he is a big-time outcross giving him great mating flexibility to so many females in the breed. Add these facts to his impressive eye appeal and you have the opportunity to make great things happen. If you own him.

Very few animals rank in the top 1% of the breed in 5 traits including growth, marbling and feed efficiency. However, I don't know if any bull that does it with this much muscle, length and capacity stacked on to a medium frame that is held up by ideal feet and legs. His mother is a beautiful cow that sells in this sale as lot 273 and brings fresh new outcross genetics in a beautiful package to the Red Angus breed.

We like this powerfully made bull so much that we chose to use him natural service on our fall calving herd. He is an impressive beast that has stayed in great shape while breeding this winter. He has an impressive 7 traits in the top 7% of the breed where he excels for growth, carcass traits, fertility and efficiency. His outcross pedigree will provide tremendous mating flexibility to most Red Angus cattle while still having a highly proven and dependable pedigree that includes AbiGrace.

We can best manage what we measure so if you want to improve the feed efficiency of your herd so that you can produce more pounds per acre with lest feed cost, then you need to select from programs that actually measure feed efficiency. Then select for bull like this one that rank in the top .01% of the population for feed efficiency and low feed intake. This along with a multitude of other strengths makes him one of the best $Profit bulls in the entire sale.

Superb feed efficiency. After three years of feed efficiency and over 3000 animals measured, we have learned that we can make rapid progress and improve profit through more efficient use of feed resources. We have also learned that you can't tell an efficient one just by looking. You have to measure the trait in order to know.

Need Calving ease bulls - here is the first of three in a row that are bred to use with confidence on heifers. You will like the way they look too. Why use a "bug eyed Jersey or a Longhorn or a Corrientes on heifers and produce calves that can hide behind fence posts when you can use a super calving ease bull like this that produce calves with the shape that appeal to buyers? Plus they should make great replacement females.

Excellent bull to use on heifers for calving ease. Use a calving ease bull that makes calving easy and adds value to your calves instead of producing calves that no one wants to buy except calf ropers and team ropers.

Some like to save the best for last. This bull ranks better than the top 1% $Profit, Feed:Gain and low intake and ranks in the top 2% for $Ranch. In addition he ranks in the top 1% for both RAAA Indexes & growth traits. Plus he is an outcross to many of the most used pedigrees in the business. Just 50 lots until the Red Angus females start. Don't let this one slip through the cracks.

SimAngus Bull Sale Catalog Data

SimAngus EPDs and Percentile Ranks:

CED - Calving Ease Direct
BW - Birth Weight
WW - Weaning Weight
YW - Yearling Weight
Milk - Daughters Milk Production
STAY - Stayability
YG - Ylield Grade
MARB - Marbling
REA - Rib Eye Area

Percentile Ranks: Percentile ranks indicate where this animal's EPDs rank vs. other non-parent animals in the RAAA database. A 10% rank indicates that animal is in the top ten percent of the approximate 140,000 non-parent animals in the ASA database

API: ASA All Purpose Index compares relative profitability per cow exposed when bulls are used on heifers and cows, replacements are kept, and all steers and cull heifers are fed and marketed on a value based grid.

TI: ASA Terminal Index compares relative profitability per cow exposed when bulls are used on mature cows but no replacements are kept, and all progeny are fed and marketed on a value based grid.

F:G EPD is a genetic prediction of relative differences in feed efficiency Lower F:G EPDs indicate less feed will be consumed to produce one pound of gain.. This EPD is calculated using Feed Intake data through the $Profit genetic evaluation.

$Ranch is an Economic Selection Index comparing bulls impact on profitability per calf when keeping replacement females and selling calves at weaning time

$Profit is an Economic Selection Index comparing bulls' impact on profitability over their productive life (100 calves).

$Profit % rank compares an idividual animal to all animals that have been evaluated in $Profit multi-breed genetic evaluation of over 1 million head.

Sale Lot Number: All bulls and registered females sell in catalog order

Animal ID: animal's tattoo no.

GGP

Docility Score Every RAB bull is individually scored 1-5 for docility where 1 represents the most docile.

Herd: identifies cooperator (herd of origin.) Go to RABrownRanch.com/cooperators/ and meet our cooperator team.

DOB: BirthDate of Animal

REG# Registration number assigned by the American Simmental Association (ASA)

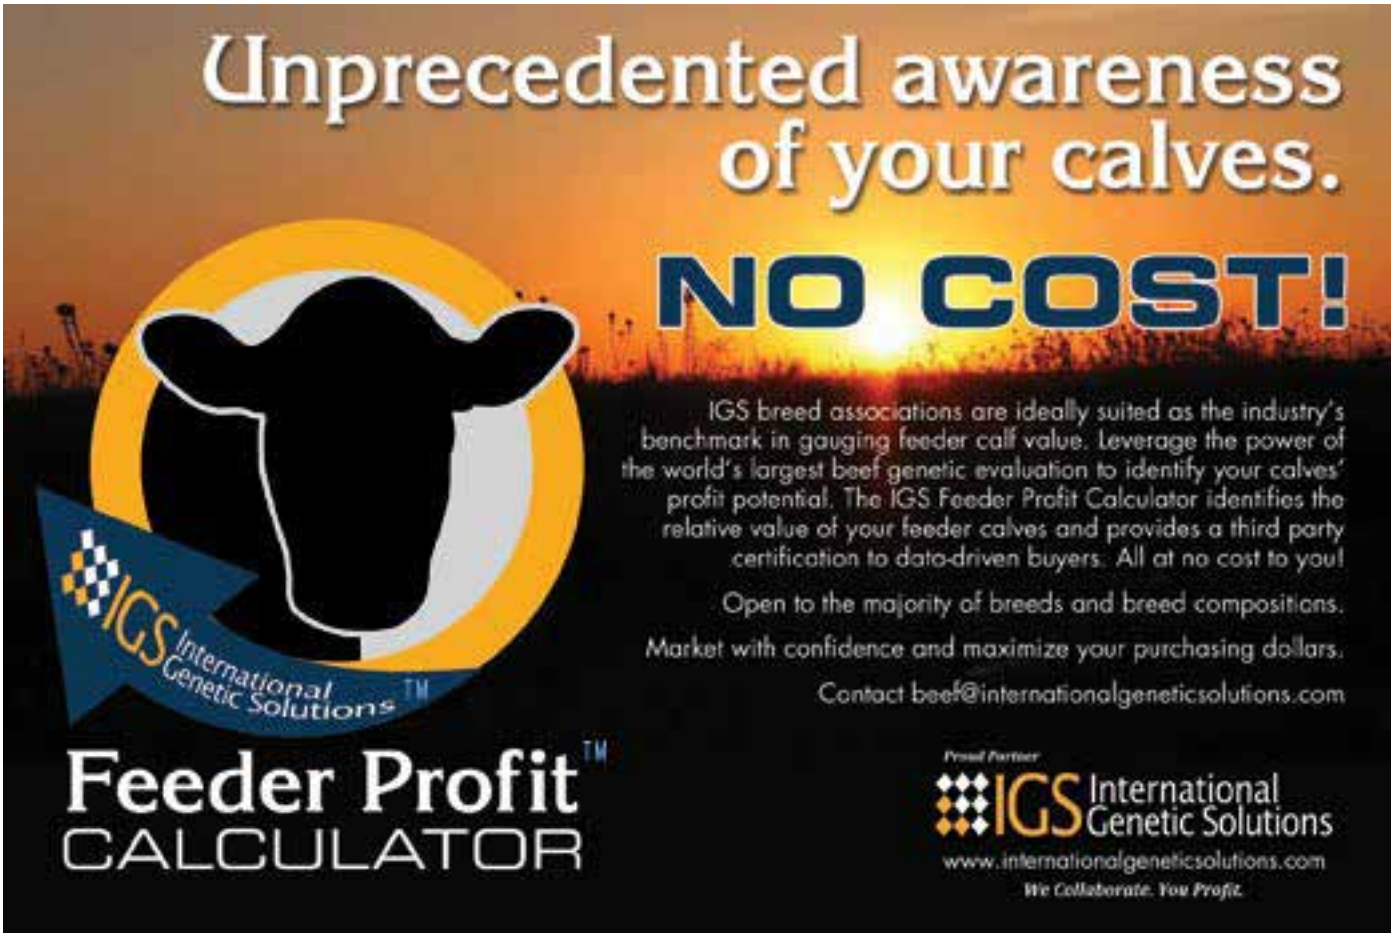
Breed%: Describes the proportion of Simmental and Angus/Red Angus for each SimAngus bull..

P/S: Polled or Scurred.

Color: Black or Red.

RAB Exclusive Star Rating System Compares bulls across breeds in 4 areas of economic relevance: Calving Ease, Growth, Carcass Merit and Efficiency. In general more stars indicate greater genetic improvement. There is a more detailed explanation of the RAB Star System in the front of the catalog.

Max Acc. The presence of a Geneseek (GGP) symbol indicates genomic data obtained through DNA testing have been incorporated into the above EPDs to ensure the highest possible accuracy for non-parent bulls.



LIVESTOCK NUTRITION CENTER

BETTER FEED, BETTER RESULTS

Livestock Nutrition Center specializes in blending customized rations, supplements and premixes to meet the specific nutritional needs of your operation. We understand that management, performance objectives and feeding practices can be vastly different between operations, and that these differences dictate specific nutritional or formulation requirements. Our experienced sales staff will work with you to design a feeding program that is specific to your operation.

Moderate, deep and thick best describe E4543. At $16,400 Profit this sire candidate offers a uniform genetic profile balancing calving ease, growth, maternal and carcass. We appreciate the type and kind here knowing these Sim Angus bulls will add that additional punch to a calf crop.

Red Angus Female Catalog Data

HdBr: RAAA HerdBuilder Index compares relative profitability per cow exposed when bulls are used on heifers and cows, replacements are kept, and all steers and cull heifers are fed and marketed on a value based grid.

GrM: RAAA GridMaster Index compares relative profitability per cow exposed when bulls are used on mature cows but no replacements are kept, and all progeny are fed and marketed on a value based grid.

Red Angus EPDs and Percentile Ranks:

CED - Calving Ease Direct
WW - Weaning Weight
Milk - Daughters Milk Production
CEM - Maternal Calving Ease
MARB - Marbling
BW - Birth Weight
YW - Yearling Weight
HPG - Heifer Pregnancy Rate
STAY - Stayability
REA - Rib Eye Area

Percentile Ranks: Percentile ranks indicate where this animal's EPDs rank vs. other non-parent animals in the RAAA database. A 1% rank indicates that animal is in the top one percent of the approximate 150,000 non-parent animals in the RAAA database

F:G EPD is a genetic prediction of relative differences in feed efficiency Lower F:G EPDs indicate less feed will be consumed to produce one pound of gain.. This EPD is calculated using Feed Intake data through the $Profit genetic evaluation.

$Ranch is an Economic Selection Index comparing bulls impact on profitability per calf when keeping replacement females and selling calves at weaning time.

$Profit is an Economic Selection Index comparing bulls' impact on profitability over their productive life (100 calves).

$Profit % rank compares an idividual animal to all animals that have been evaluated in $Profit multi-breed genetic evaluation of over 1 million head.

Max Acc. The presence of a Geneseek (GGP) symbol indicates genomic data obtained through DNA testing have been incorporated into the above EPDs to ensure the highest possible accuracy this animal.

Sale Lot Number: All bulls and registered females sell in catalog order

Animal ID: animal's tattoo no.

This is one of the elite profitability females in the Red Angus population – no surprise her maternal grandam is the breeds' all-time High Revenue donor, Brown Ms Abigrace L7730. In addition to delivering a beautiful udder and raising a fancy heifer calf, C1529 delivers breed impacting genetic reach in the economically relevant traits of grade, gain and pay weight.

Tremendous spread from Calving Ease to YW and top 1% ranks for the traits the dictate quality grade and feed conversion make this Sure Fire daughter one of the interesting outcross females to be offered this spring. Her young dam dove right into the deep end of the Abigrace genetic pool – she's already earned a 105 MPPA as just a three year old.

This is the first of two very similar daughters of 5L Bourne that excel for cow/calf profitability. Bourne is the highest $Ranch bull we've found amongst proven Black or Red Angus sires. Rapid early growth with moderate mature cow size and exceptional feed conversion make Bourne daughters efficient factories.

Even after a decade and a half of genetic trend, few bulls compare to Revelation when it comes to combining gain, pay weight, muscle, quality grade and cow herd fertility and longevity. His semen is very rare and last we knew – sold for $300 per unit, so the best way to add his influence is through his very good daughters – Just like these powerful flush-mates that sell as Lots 5 & 6.

C-BAR & BROWN ABIGRACE

Think of all the great seedstock that have resulted from linebreeding, then consider these profit-oriented full sisters. With P707 and AbiGrace each on both sides of their pedigrees they are double bred to the most influential Red Angus sire and dam of the last decade. Whichever index you use to predict profit – these sisters rank at the top of the breed.

Get in on the ground floor of one of our highest selling cow families. This young Revelation daughter tnot only earned a 121 IMF ratio, but her dam, B501 was the $12,000 high selling female at the recent "Roots of our Success" Sale. And, B501 is a full sister to both X7580 the $30,000 donor from our 2013 sale and X7582 who topped our 2016 sale at $23,000.

This is the monster rib eye maternal sister to D708, who sells as Lot 251. If your customers sell them by the pound, they'll like sons of this outcross female who tops 1% ranks for gain and carcass weight. Consider how profitable those extra pounds will be when you factor in her best 1/10th of 1% feed conversion and elite ranks for carcass value traits.

It will be a tough choice between D1532 and her dam who sells next in the order. Think of the A.I. stud quality calving ease bulls that could come from this 18 CED to 106 YW daughter of 10X and B530. With cow herd traits well above most Angus and carcass value well above most Red Angus, D1532 is a herd bull mother waiting to happen.

B530 defines a front pasture female. That's no surprise, her sire, Synergy is a full brother to X7580, X7582, B501 – some of the most beautiful udddered, deepest ribbed, softest flanked females to ever wear the BROWN name. But B530 is more than just a pretty face, her best 1% profitability is delivered through predictions of more live calves, lower replacement rates due to increased fertility and longevity and higher calf value.

Fantastic is a recent addition to ORIgen's Red Angus lineup and has emerged as the "go-to" calving ease bull to add eye appeal style and brood cow character. F993 combines two of RAB's all time most influential females: Abigrace and Y6648 – the dam of Oracle and Fantastic.

With over 350 progeny, countless herd sires and 2 Million in progeny sales it safe to say this is Red Angus's most impactful cow family. Here the tough choice may be between the deep bodied Trilogy 2-yr-old and her elite numbered black/red Sure Fire heifer calf. When in doubt – Take both.

Lot D830 presents another important branch to the Abigrace family – the one that passes through X7603 - one of the breed's most accomplished Revelation daughters that sold to Benji & Lori White in our 2016 sale, and back to T717 – the dam to Stakeholder and current donor for 3K Land & Cattle. D830 sells with quite a prospect of her own – a black/red heifer calf by Bandwagon.

Talk about outcross genetics – This Bandwagon daughter traces to three unique and ultra-high accuracy Black Angus sires through her paternal grandsire, paternal grandam, and maternal grandsire. She balances those proven Angus genetics with some of the most respected cows in Red Angus history; Black Adina 560, X7603 – a candidate for best Revelation daughter, T717 – Stakeholder's dam, and of course AbiGrace.

This Absolute daughter dominates for gain & grade, and with very useful spread from CED to YW, she should be able to crank out some "Stud Quality" calving ease bulls. A full sister to this female sold for $11,500 to Willows Farm in Union Bridge, Maryland. Their dam, W996 is in the conversation for Breed's best Commitment daughter and currently is a prolific donor for 3B Bar Ranch.

Few Angus sires, Red or Black have so consistently delivered the phenotype and natural thickness that commercial ranchers desire as Basin Payweight 1682; that's why we felt it was so important to make that mating with Abigrace while we still had the opportunity. D1576 didn't disappoint earning 111 IMF and 106 REA ratios then breeding early AI and calving at 22 months of age.

Here's a spot where you may want to double down and buy both sisters, because it's going to be very difficult to choose between this book matched pair of high-octane profitability sisters. Originally, their maternal grandsire, Premier, shared curb appeal with his flush-mate, Brown Paramount, but finally, Premier has emerged as a proven sire to improve quality grade, feed efficiency and pay weight without sacrificing calving ease.

This sister really follows her maternal grandsire's genotype, with dominating breed ranks for Marbling, Feed Efficiency and $Profit all while providing exceptional spread from CED to YW. If you want to make sure you've got the best sister, buy both, calve them out then try to pick which one to flush; maybe both?

69# Red X-PORTER Heifer Calf born January 11th. Here's a 5/8 sister to the $100,000 Fantastic who also extends another important and prolific branch of the Abigrace family free. Her grandam, Y7697, has 45 recorded progeny at a relatively young age and has been a herd bull machine for ourselves as well as Ludvigson, and Bachman.

This outstanding Abigrace daughter is bred to Sleep Easy; you'll notice his service on many of the young females in the sale – and for good reason. Sleep Easy comes with an 18 CED to 117 YW spread that is hard for most calving ease bulls to match. Throw in best 4% REA and you'll find he's the only Red "heifer bull" in the RAAA database that also adds that much pay weight and muscle.

This heifer's dam, B555 was one of the embryos produced when our family allowed Kelli & I to flush some of the leading RAB donors to continue the work of the RAB brand; she recently was a feature lot in our inaugural Roots of our Success Sale. B555's dam, Y6646 was a feature of that Dispersal and contributed mightily to the Ludvigson and Strawberry Ridge programs.

76# Red FANTASTIC Heifer Calf born January 14th. Power cows like these flush-mates that sell as Lots 309 & 310 deliver the genetics to improve gain and conversion. These two also add depth, volume, and natural thickness; the shape our commercial ranching customers tell us they want in their replacement females. Added bonus - the calves at their sides are full-sibs in blood sired by the $100,00 Fantastic.

One of the great value drivers across the beef industry of our customers and their customers –cow/calf, stocker, feeder – is uniformity, and that starts with similar genotype, and you can't get much more similar than full sisters. Just like these two daughters Premier – a candidate for "Best all around" in Select Sire's Red Angus bull battery.

The value in these elite F:G females cannot be overstated. If you can build genetics that shave just half a pound of dry matter off of one pound of gain, that can easily translate into over $3000 of saved feed over the lifetime calf crop of each bull produced from a female such as E896.

Here's a buyers' market just waiting to happen. E870 is an outstanding daughter of Oracle who sold in our 2015 for $36,000 to Leachman Cattle of Colorado. But, she comes with a birthmark on her shoulder. Such birthmarks rarely ever get passed on to offspring, but they almost always detract from an otherwise valuable animal - with Top 12% ranks for HerdBuilder, GridMaster and $Profit certainly is almost certain to produce an outstanding ROI.

66# Red FANTASTIC Bull Calf Born January 22nd. If you like stacking proven cow families in a single pedigree, Lot 330 is the first of three full-sisters who do just that. Their dam is a full sister to Stakeholder and donor dam for Shieldknight Land & Cattle. Their paternal grandam is our favorite Destination daughter and perhaps the only cow to ever produce two $40,000+ bulls in the same sale.

63# Red FANTASTIC Bull Calf Born February 1st. To sweeten the pot on these three full sisters selling as Lots 330-332, we bred them all to the $100,000 calving ease specialist, Fantastic. Their calves will be full-sibs in blood and will add Y6648 – the dam of Oracle and Fantastic and certainly a candidate for the breed's top P707 daughter.

We love the shape, length of body and natural thickness that ProfitBuilder stamps his progeny with, and this fall heifer calf is no different. With her elite ranks for gain and quality grade traits all you have to do is mass produce sons out of her, and watch your bull customers line up for GridMaster awards.

This female's full sister was the $11,500 second high seller in the first "Roots of our Success" sale last fall, and this sister has the best feed efficiency EPD ranking in the upper echelon of Red Angus' top 1%. Absolute is a rock solid 98% accuracy sire, but still relatively new to Red Angus pedigrees. She ranks in the top 12% or better for 9 traits.

risk management

Shari Holloway, agent/partner
580.695.3788
shari.holloway@icloud.com
We are an equal opportunity agency.

A full service insurance agency dedicated to defending your *agricultural risks!*

Ask us about any of these risk management tools –

- Crop Insurance (including RAINFALL INDEX)
- Whole-Farm Revenue Protection
- Livestock Mortality Insurance
- Livestock Risk Protection Insurance
- Farm & Ranch Insurance
- Homeowners Insurance
- Auto Insurance
- Life Insurance
- Health Insurance

SALE SPECIALS!!
Ask Shari for more information!

✔ Do you need insurance on your show cattle?
✔ Protection of your cowherd against catastrophe?
✔ Grass and hay protected from lack of rainfall?

INSURANCE AVAILABLE SALE DAY

Offering livestock mortality and bull infertility insurance sale day. Ask for rates at the clerks' desk.

Feel free to visit with Shari Holloway on sale day to discuss risk management options for your cattle operation.

GUARANTEES

SALE TERMS. CONDITIONS. GUARANTEES.

Except for those stated in the below terms and conditions, there are not warranties, either expressed or implied, as to merchantability or fitness for a particular purpose with respect to the cattle being sold at this auction. The warranties and guarantees are set forth in these Terms and Conditions are in lieu of all other warranties, either expressed or implied, and the remedies provided therein shall be the sole and exclusive remedy of the purchaser or any party claiming through purchaser, for any breach of warranty or guarantee therein provided, and all other obligations or liabilities.

BIDDING Each animal will be sold to the highest bidder. The auctioneer in charge will settle any disputes as to bids, and his decision on such matters shall be final.

TERMS of the sale are cash or check to the clerk at the conclusion of the auction. Animals are not to leave until paid for in full.

PURCHASER'S RISK Each animal will be at the Purchaser's risk as soon as sold, but it shall be the obligation of the seller to see that animals are fed and cared for free of charge to purchaser, until loaded for shipment or until the expiration of (72) hours after the sale for animals being picked up by the Purchaser. Animals being delivered will be cared for at no charge until delivered.

ANNOUNCEMENTS & SALE DAY SUPPLEMENT Printed information on the sale day supplement takes precedence over printed information in this catalog. Announcements from the auction block will take precedence over printed material in this catalog and on the sale day supplement. All animals will be sold by lot number as announced from the auction block. Every effort has been made to assure correctness of the catalog, and in most cases, information quoted concerning the animals is taken from the respective breed association's official records.

PERSONAL LIABILITY All persons who attend the sale do so at their own risk and the R.A. Brown Ranch, its employees, cooperators, consignors and all other person connected with the management of the sale, assume no liability, legal or otherwise.

IDENTIFICATION Seller offers each registered animal with a readable tattoo corresponding to its catalog designation and registration when applicable.

REGISTRATION TRANSFER If you want registration certificates transferred to you, this request must be made with the sale clerk at settlement on sale day or within twenty (20) days thereafter by written notification. After twenty (20) days, the transfer fees will be the responsibility of the Purchaser. All registration certificates will be withheld until the check clears the bank. Registration certificates will be mailed to you within ninety (90) days of date of sale. Inform the clerk when checking out if you need them sooner than ninety (90) days.

HEALTH CERTIFICATES will be furnished on all animals going outside of Texas as soon as all required testing is complete. Some states require testing that may take several days to receive the results before our veterinarian can complete the health certificate to send cattle to your state.

BULL BREEDING GUARANTEE 1. All animals are guaranteed to be breeders with the exception of: a) Injury or disease occurring to the animal after time of sale; b) Gross negligence or willful misconduct on the part of the purchaser; c) Animals shown competitively after being purchased in this sale. 2. Any bull which either a) settles 1/3 or more of the healthy cows he serves; b) is the sire of 20 or more animals; or c) settles cows by natural service and passes a fertility test made by a competent veterinarian during any 6 month trial (provided for in the section of these sale terms and conditions entitled "Options and Privileges of Return or Adjustment") shall be considered a breeder. Any guarantees with respect to the ability to freeze semen shall be made by separate agreement between the Purchaser and Seller.

REGISTERED FEMALE BREEDING GUARANTEE 1) Safe-in-calf females have been examined by a competent ultrasound or palpation technician and are so guaranteed. All females that have been diagnosed safe in calf, have a projected calving date or date range printed in this catalog or in the sale day supplement. All projected due dates and embryo sexing are best estimates only and are not guaranteed. Please remember that it is normal for females to give birth throughout the two weeks either side of their projected due date. 2) AI or pasture exposed females have been exposed, but are not guaranteed safe in calf. They are guaranteed to be breeders. 3) Open females have been examined open and are so guaranteed. Open females are guaranteed to be breeders or produce viable embryos if the Purchaser chooses to put the cow into embryo transfer. 4) Donor Females a) A female which has been used in an embryo transfer program and sells open is not guaranteed to be a breeder after date of sale unless by separate agreement between the Purchaser and seller. b) A female is not guaranteed to be a breeder after date of sale when that female is to be used, or attempted to be used in an invitro fertilization (IVF) program or embryo transfer program, unless by separate agreement between the Purchaser and seller. c) There is no guarantee as to the suitability of any female for embryo transfer.

COMMERCIAL FEMALE BREEDING GUARANTEE All Commercial Females sell safe in calf. They have been determined pregnant by a competent ultrasound or palpation technician and are guaranteed to be pregnant through November 15th following this sale. It is common for a small percentage of females to lose a pregnancy between palpation and calving. If you determine that one of the commercial females is not pregnant prior to November 15th, then please call us and you will be reimbursed by the seller of the heifers the difference between her purchase price and the salvage value you receive for her.

SELLER'S SEMEN RIGHTS 1) Seller retains a 50% revenue sharing semen interest and no possession, in every bull in this catalog unless otherwise noted in this catalog or in the sale day supplement. Future semen collections of the bull must be made known to all owners prior to collecting. These collections and costs will be divided according to each owner's interest, unless otherwise agreed upon mutually by all owners prior to collection of said semen. 2) On any bull in the sale which is collected in the future, Seller reserves the right to 100 straws of semen with registration rights and will pay their portion of the collection costs. 3) Further official terms for this section are described at the front of this catalog entitled "Retained Interests in Bulls."

OPTIONS & PRIVILEGES OF RETURN OR ADJUSTMENT

1) The following adjustments do not preclude the right of the Purchaser and seller to mutually agree upon other terms and conditions for settlement of any dispute. All claims for adjustment or refund must be made in writing either within six (6) months from the date of sale or no later than when the animal reaches 24 months of age, whichever occurs later, with the exception of claims involving parentage or defects. 2) All returns or refunds will be paid in the form of a replacement animal of similar quality or in credit for use on any products marketed by the seller. a) This credit will be limited to the purchase price less the salvage value of the animal. b) Salvage value = Market price x greater of "current weight" as taken in September prior to the sale or the animal's current weight at the time of salvage, whichever is greater. 3) In the event an animal is claimed to be a non-breeder, the animal may be returned to the ranch of the Seller, at Purchaser's expense, if in good physical condition, and the return is in compliance with the health requirements of the Seller's state. The Seller shall be entitled to a six (6) month trial period following the return of the animal in which to prove that the animal is a breeder. If at the end of six (6) months the Seller is unable to prove the animal is a breeder, the seller shall, at the option of the Purchaser, replace the animal with another of similar value or grant the Purchaser a credit on any products marketed by Seller. Either of these options shall be deemed full satisfaction and settlement. If the Seller proves the animal to be a breeder, it shall be the obligation of the Purchaser to take delivery of the animal and pay all expense incurred for transportation. 4) If a registered female sold as "safe-in-calf" proves not to be in calf (by the projected due date listed in the catalog or sale day supplement), the Purchaser may receive service from the bull previously used, if available or if the bull is not available the Seller shall be obligated to credit or refund the Purchaser $400. Any adjustment provided for herein shall absolve the Seller from further liability, except in case such female proves to be a non-breeder. If a female represented as "safe-in-calf" at time of sale to a certain bull proves to have been bred to a different bull, the Seller shall be obligated to reimburse the Purchaser up to $600 (adjustments shall not be considered to be a breeding fee or an allocation of the purchase price to any unborn calf). Any expenses incurred for transportation shall be the responsibility of the Purchaser. 5) If a female sold as "open" proves to be with calf, the Purchaser may return the animal to the farm of the Seller prior to calving for a credit of the full purchase price or for another animal of similar value, whichever is acceptable to the Purchaser. It shall be the obligation of the Seller to bear any expense incurred for transportation.

GENETIC CONDITION, DEFECT & PARENTAGE GUARANTEE 1) Technology is helping identify numerous genetic conditions that have been in the general cattle population for many years. Those known today include: Arthrogryposis Multiplex (AM), Double Muscling (DM), Dwarfism (DW), Hypotrichosis (HY), Alpha-Mannosidosis (MA), Neuropathic Hydrocephalus (NH), Osteopetrosis (OS), Protoporphyria (PR), Pulmonary Hypoplasia with Anasarca (PH), Syndactyly (SN) (Mule Foot), Tibial Hemimelia (TH), Neuropathic Hydrocephalus (NH), Contractural Arachnodactyly (CA) (Fawn Calf Syndrome), Parrot Mouth and Developmental Duplications Mutation (DD). Most of these are believed to be simple recessive in inheritance. These condition can be effectively managed by strategic DNA testing and avoidance of breeding carrier females to carrier bulls. All potential carriers of any of these defects will be tested with the results printed in this catalog or in the Sale Day Supplement. Animals tested as a carrier of one of these genes are noted with a (C) after the abbreviation. In the case that an animal is homozygous for that gene, then they will be listed with an (A) after the abbreviation.

The parentage of the animals bred by the Seller is guaranteed to the extent that the animal is by the Sire and out of the Dam indicated on its registration paper. These guarantees are effective for a period of two years from the date of sale only under the following conditions. a) The Purchaser shall notify the Seller in writing immediately upon the birth of a calf suspected of being defective or immediately after determination is made that such calf is defective, or if parentage is suspected or found to be in error. b) The Seller, at his expense, shall be permitted and provided, with reasonable opportunity, to obtain DNA samples of an alleged defective calf and its sire and dam for the purpose of DNA analysis to establish parenthood. In the case of suspect parentage, the Purchaser at his expense, shall be permitted and provided with reasonable opportunity to obtain DNA samples of the animal in question and its sire and dam for the purpose of blood type/DNA analysis to establish parenthood. If sire or dam is indicated on the animals registration paper is proven to be in error by such analysis, the Seller shall reimburse Purchaser for cost of such analysis. c) The animals will be returned by the Purchaser to the Seller at the Purchaser's expense; provided the animal meets the health requirements for the Seller's state. d) The replacement of an animal with another of similar value or the refund of the purchase price, in connection with a defect producing animal or an animal whose parentage is in error, shall be deemed full satisfaction and settlement.

2. In the event there is a dispute as to whether or not a calf is defective, or parentage is in error, "determination "referred to in Paragraph 1A above shall be made by a person or persons acceptable to both the Purchaser and Seller. In the event that the Purchaser and Seller cannot agree on the selection of such person or persons, then each of them shall appoint a representative to make the determination. In the event that such representatives fail to agree, a third person selected by the representatives of the Purchaser and Seller shall make the determination.

RIGHTS AND OBLIGATIONS The terms and conditions of sale shall constitute a contract between the Purchasers and Sellers of each animal and shall be equally binding upon both. Any subsequent sale or resale of an animal constitutes a separate transaction.
